About Canyon

With sales channels in more than 50 countries globally Canyon Technology is one of world's fastest growing brands of Consumer Electronics. Canyon has a diverse workforce of more than 70 employees in three strategic regions: Asia, Europe and the USA.

Canyon Technology inc. has been established in Beaverton (U.S.A.) in 1999. European and Asian offices have been opened in 2003. Canyon offices are currently based in the USA, Hong Kong, Taiwan, China, The Netherlands, Cyprus and the Czech Republic. Representative offices are based in 27 countries globally.

Canyon's assortment of more than 150 different products is divided into 3 major segments: Canyon Regular Line, Canyon Sportsline and the Canyon Platinum Series.

Mission — Canyon strives to become one of the leading brands in the EMEA region by delivering innovative products with an optimal price quality ratio combined with outstanding customer service to a wide variety of consumers.

Regular Line

Where quality meets price

The Regular Line is the value for money product line of Canyon and contains a wide range of IT and CE related products. The unique selling points are: attractive retail packing, user friendliness, latest technology and a well balanced market price. Unlike other brands Canyon has its own quality control staff in the production facilities in China, Taiwan and Korea. This results in the best quality / price ratio.

MP3

MP3 > In line with Canyon's tradition to offer high-quality consumer electronics, the CN-MP4A/D is the affordable price aggressive MP3 player. It is a shiny white or black USB MP3 player with a trendy blue display. This MP3 player is available in a whole variety of capacities and optional available with an FM radio. This trendy MP3 player suits almost every person.

CN-MP4A / CN-MP4D ▲►

MICE

Mice > Canyon uses two technologies in its wide line up of mice: Optical and G-laser, also called Super Optical. G-laser is the technology which has combined the key advantages of optical and laser technology. Unlike laser technology the Canyon G-laser mice work on every surface, even on transparent glass, with the precision of a laser mouse. The resolutions of the optical mice are either 800 dpi or 1000 dpi. Canyon combines laser and optical technology into Super Optical technology for an affordable price.

DESIGNED TO MOVE

Designed To Move

The Canyon Sportsline product range is developed for active users who are looking for functional, shockproof and water resistant electronic products that can be used for outdoor and indoor sport activities. The Canyon Sportsline's unique selling points are durability and functionality combined with an affordable price level.

Sports Watches

Sports Watches

For fitness, running and other sport exercises, Canyon offers the SportMaster (CNS-SW1). The Heart Rate Monitor Watch comes standard with a chest belt for accurate heart rate measuring. During your exercise the watch shows the calories and the fat you have burned and it allows you to monitor your heart rate in % of your maximum heart rate, related to your age and current heart rate. In total the SportMaster offers 25 functions.

Suitable for outdoor and sports activities like hiking, mountain biking, skiing, running and more, the line up contains an outdoor watch: the NavMaster (CNS-SW2). It offers features like an electronic compass, an altimeter, a thermometer, a stopwatch and an alarm clock.

The SkiMaster (CNS-SW3) is a functional watch for people who enjoy outdoor activities, especially skiing and snow boarding. The special Ski mode offers features like slope setting, lap trigger, lap memory, altitude range and travel time.

OUTDOOR

CANYON
sportslines
DESIGNED TO MOVE

CN-GPS1 > The Canyon GPS Outdoor Trainer provides a full-sealed waterproof (IPX7) and large LCD wrist watch device, as well as GPS navigation function with a physical training system. It is developed for people who are into outdoor sports, like running, hiking, biking, skiing, snow boarding, surfing, etc. You can see your performance based on: distance, speed rate, time, GPS location, etc. The training system offers you the possibility to define your performance by setting your training target time and alerts if you go above or below certain workout thresholds.

The GPS navigation offers the finest precision due to the SiRF Star III chipset and WAAS/ENGOS support. The GPS functions let users map a location, mark a trace point, find a marked point and comes with backtrack mode. Via its USB interface, the GPS Outdoor Trainer can be used as a GPS receiver for notebook users and the firmware is upgradeable.

Saved training / tracking information can be exported (KML file) to Google Earth, so you will see the route you have taken during your activity.

Webcams >

Trying to be different? Canyon offers webcams with a unique design. The shape and Material are completely different from any other webcam on the market. Both desktop models are made of stainless steel with black rubber coating which expresses its style and quality. The notebook webcam is made of brushed aluminum with black rubber coating and is unique in its class because of the 360 degrees rotating top. The webcams are designed for both office and home use. All models are compatible with Skype, MSN and Yahoo.

CN-WCAMN1 >

This mini notebook 1.3 Mega Pixels webcam is a real eye catcher. Its design and its image quality is the top of its class. The face tracking software automatically zooms in or zooms out on your face while moving your head in front of the webcam.

VOIP

Voice over IP

Voice over Internet Protocol, also called VoIP, IP Telephony, Internet telephony, Broadband telephony, Broadband Phone and Voice over Broadband is the routing of voice conversations over the Internet or through any other IP-based network.

Canyon introduces in its Platinum Series product line a full range of VoIP products. All products are fully compatible with various VoIP software like Skype, MSN and Yahoo.

VoIP Station >

The Canyon VoIP teleconference Station (CN-VS1) is a USB speaker phone suitable for hands free teleconference by using any VoIP software. Key features are: 2-way communication without echo, high audio quality, compact design, USB port, headset and microphone connector (for private calls).

**◀ CN-VS1**

1.5W RMS USB audio speaker
Omni directional high sensitive microphone
Full duplex
USB2.0 port for USB device
Additional headset and microphone input jacks
Answer and hang up function when using Skype

**VoIP Headset >**

This single side USB headset with a tube type microphone is a professional solution for VoIP. It offers both volume and mute control for the headset and the microphone. The headset is comfortable to wear as it is made of light weight material.

**◀ CN-HS5**

Single side USB headset
Tube type microphone
Volume and mute control headset
Volume and mute control microphone USB interface
Compatible with Skype, MSN, Yahoo.

VoIP PACK >

The Canyon Platinum Series' VoIP Pack is a complete solution for Voice over IP. This professional pack contains a webcam and headset with microphone. Both offer a state of the art design and technology. Compatible with Skype, MSN and Yahoo.

VoIP Phones >

Canyon introduces 2 models of VoIP phones, a wired and a wireless Bluetooth model. Both allow you to make and receive VoIP calls provided by the leading VoIP software vendors like Skype (Skype Out), MSN Messenger and Yahoo Messenger. Suitable for PC-to-PC calls and PC-to-Phone (Skype Out) calls.
